

Western Atlas

Resources Inc.

Junior Geologist

Job Description

Western Atlas Resources, a company focused on the acquisition and development of precious metals mining projects and scalable deposits in premier mining jurisdiction is looking for a Junior Geologist.

The Junior Geologist will report directly to the VP Exploration and to the CEO, upon request.

Junior Geologist

Reporting to the VP of Exploration, the Junior Geologist will contribute to the planning and execution of the exploration program as well as the development of the geological and mineral system for the Meadowbank and Committee Bay area Projects (the "Projects"). This role requires the candidate, among others, to demonstrate geological knowledge and additional awareness of all government and corporate regulations and policies. This role has the potential for growth and career advancement at the proposed Projects as well as at other potential projects the Company may add to its portfolio of business.

The candidate must be willing to travel to the Company's project site in Meadowbank and Committee Bay in Nunavut, Canada where the Geo will be working directly with our team of mining professionals. Lodging at site will be provided in Baker Lake. When at site the shifts will be on a 3:1 basis (3 weeks at site and a week out).

Responsibilities include, but are not limited to:

- Conduct mapping and surface geochemical sampling programs, including regolith and outcrop mapping, and rock chip, soil and stream sediment sampling;
- Supervision of drilling & other contractors to ensure the efficient a safe development of the Company's exploration program;
- Assist contractors during geophysical field survey programs;
- Prepare sample submission to assay laboratories; track and receive assay results;
- Data entry of geological logs and spatial data with regard to quality control; and validation and quality control of all exploration data to ensure a robust exploration database;

Western Atlas

Resources Inc.

- Extraction, manipulation and plotting of data on plans and sections using exploration and mining software to visualize and present exploration results;
- Contribute to weekly deliverables and interpretation of geological, assay and geophysical data.

Qualifications:

- Bachelor of Science Degree in Geology or equivalent;
- Prior work experience at a mining/exploration operation highly regarded;
- Demonstrated excellent work ethic, communication & organizational skills;
- Ability to work outdoors in all conditions;
- Able to work in camp setting;
- Able to work day shift or night shifts.

Location:

Position will require seasonal travelling to the Meadowbank and/or Committee Bay sites, Nunavut, Canada (please see shifts details under the Job Description).

Schedule:

Full Time

Language requirements:

English. Additional, knowledge of Spanish is considered a plus.

Compensation

Extremely attractive package is being offered including benefits and options to the right driven individual.

In return, you can expect:

- Play a major role in the forming of multi million-dollar Mining Company;
- Work closely with a Board and Management team of seasoned and extensively successful natural resources professionals and top league financiers;
- Join a team of extremely determined people whose focus is the successful development of the Company and its current and future projects.
